PERSONAL PROJECTS

Detection Of DDoS Attack Using Machine Learning Model [🔗](#)

- Simulate a DDoS attack (tcp_syn flood) using Kali-Linux, hping3 and analyze it using Wireshark (packet analyzer)
- After analyzing manually, we can detect that there was some suspicious activity going on. Since here I have to use machine learning, so for that we create a dataset from Wireshark (that captured)
- Then using machine learning, build a model "SVM (support vector machine)" and predict behavior of each packet with higher accuracy

Music Soul Webpage(Link) [🔗](#)

- Develop a web page using Html, CSS, JavaScript contains different sections and also we can play music and also can go to different artist section.
