PROJECTS

Credit Card Default Prediction Classification

Achievements/Tasks

- Developed a supervised classification algorithm to predict whether a customer is eligible for approval of credit card.
- Feature Engineering, Outlier Treatment and EDA was performed.
- Implemented multiple algorithms like Logistic Regression, KNeighbors, SVCDecision Tree and Ensemble Techniques were used.

Seoul Bike Sharing Demand Prediction Regression Project

Achievements/Tasks

- Developed a Supervised Learning Regression model to predict the Bike Demand.
- Implemented multiple algorithms like Linear Regression, XGBoostRegression, Random ForestRegression etc and best model was selected based on R2 Score of 0.91.
