KEY PROJECTS UNDERTAKEN

Project Name: ConstroTech Private Limited

Team Size: 8

Summary:

Basic idea of the project is to show all the information related to construction based on city. As of now all top builders are having their own websites, but this project will combine all the info of top 10/20 builders from each city at a single point so that user can easily compare their quality and can select a proper builder. If user want to construct thier own banglow or building then this application will provide all the information related to architect, authorized dealers for the material, top 10 contractor in that particular area. The whole project consisted of different modules i.e. different pages of the current web application.

Role: Junior Software Engineer

Responsibilities:

Involved in the design and development of application as per requirement for all module.

Used technologies HTML, Angularjs and CSS.

Access levels hide and show features / web pages as per module and access.
