SKILLS

Python · DBMS · MySQL · C++ · Data Structures · JavaScript · HTML · CSS · Data Science · React.js-Beginner · Problem Solving and Analytical Skills

PERSONAL PROJECTS

Stock prediction Model using Machine Learning
- I have done this project during my Internship with Technocolabs Softwares.
- I have created a LSTM model.

invoice-Generator using React.js
- An Invoice creator project built with React. Add itemized items, configure quantity, prices, tax rates and discounts. Download Invoice as PDFs to your device. Uses jspdf-react to capture the data from the modal and covert it from canvas -> pdf.
- https://invoice-generator-react.netlify.app/

News X
- This is a basic project based on React.js which fetches categorical News from a News API.
